Skills

Development & Data JavaScript, TypeScript, React, PHP, Laravel, Python, SQL, PostgreSQL, jQuery, C, C++, Java
Cloud & Infrastructure Docker, Terraform, AWS Lambda, AWS Step Functions, AWS VPC, S3, ECS, EC2, RDS
Tools & Testing Git, GitHub, Azure DevOps, Azure Pipelines, Postman, Jest, PHPUnit, Linux

Experience

Korbyt

Software Engineer

Addison, TX

July 2024 - Present

- Architected and deployed automated data pipeline as sole developer, using Node.js, PostgreSQL, and S3 to fulfill major customer's need for complete content records, providing complete flexibility in data analysis
- Led team to develop scalable web capture service using Docker on AWS Lambda and Playwright, allowing customers to securely display dashboards with unique authentication flows on digital signage players, helping to secure contracts
- Collaborated on four-person team to rewrite legacy PHP by refactoring SSR pages into modern React SPA with Laravel Inertia backend, significantly improving page performance, maintainability, and user experience

Capital One

Software Engineer Intern

Plano, TX

June 2023 - August 2023

- Built Java Spring Boot REST orchestration layer for call center's Interactive Voice Response receiving 50,000+ calls/day
- Refactored 2 outdated SOAP services to ease maintenance burden and guide future integration efforts
- Created automated tooling to parse XML and Java in 26 SOAP repositories in order to generate Java 17 code

Software Engineer Intern

June 2022 - August 2022

- Worked with 3 other interns to create full-stack application to allow submission of 6 tech modernization metrics
- Scripted AWS Lambda in Python to fetch metrics from REST API and produce metrics to Apache Kafka stream

Education

The University of Texas at Dallas

B.S. in Computer Science, B.S. in Economics

Richardson, TX

August 2020 - May 2024

- GPA: 3.769/4.000
- Honors programs: National Merit Scholars, Collegium V, CS²

Projects

EOGorgeous

TypeScript, ReactJS, Tailwind CSS

HackUTD

- Competed in HackUTD and designed allocation optimization algorithm and web app in team of 4
- Won EOG Resources company challenge

BetterMDb

TypeScript, ReactJS, Tailwind CSS

Competitive Summit Entry

- Architected mobile-friendly Open Movie Database search engine using ReactJS and Tailwind CSS
- Achieved acceptance into Capital One Software Engineering Summit

Comparison of Online Portfolio Selection Algorithms

Python, Matplotlib, NumPy

ACM Research

- Worked with 3 other students and mentor under guidance of faculty advisor
- Implemented 9 portfolio selection algorithms and then presented our research before our peers and faculty panel

RTSC ERCOT Tracker

Python, Requests, Matplotlib, Beautiful Soup

Personal Project

- Developed tracker and visualizer for ERCOT data during power grid instability in Texas
- Graphed supply, demand, and their difference for power grid across 260+ datapoints
